RAILWAYS.

(denotes that this work is advertised in Engineering News.)*

ALEXANDRIA, LEESVILLE, LUFKIN & WESTERN.—Preliminary survey is being made for this line between Alexandria and Leesville, La. J. FARROW, of Leesville, La., has contract for grading. W. J. Sharp and Michael O'Brien, of Leesville, La., and P. H. Signor, of Shreveport, La., are the promoters. The Progressive League of Leesville, has adopted a resolution to subscribe $30,000 by citizens of Leesville for this proposed railway.

ALTUS, ROSWELL & EL PASO.—Incorporated in Oklahoma to build from Altus, Okla., southwest to El Paso, Tex., 400 miles. Capital stock, $3,000,000. The incorporators are: Edward Kennedy, Houston, Tex.; H. E. Chapman, Cape Beach, J. G. Adkins and John D. Rogers, all of Altus, Okla. Noted on March 19.

CAIRO & NORFOLK.—This company will "construct a new independent trunk line railroad from the Mississippi River, at or near the mouth of the Ohio River, by the most direct air line through Kentucky and Virginia to the Atlantic seaboard, making a terminal at or near Norfolk, Va. The total trunk line will be approximately 850 miles in length, with approximately 700 or 800 miles of branch line to feed and sustain the main trunk. The present plans contemplate the early construction of about 400 miles of main line from Wickliffe and Fort Jefferson, Ky., upon the Mississippi River, just below the mouth of the Ohio, and distant about four miles from Cairo, Ill., to some point upon the Kentucky and Virginia State lines, probably Bristol. Surveys and preliminary lines have been run over this territory, and a direct and feasible route is easily obtained with low grades and every advantage for heavy traffic." Officers are as follows, officers being ex-officio members of the board: L. W. Goode, Pres., 111 Broadway, New York; B. A. Neale, First Vice-Pres.; H. C. Neale, Second Vice-Pres.; Robert E. Lockridge, Treas.; E. S. Beaumont, Secy., all of Mayfield, Ky.; E. C. Weston, Asst. Secy., Wickliffe, Ky.; W. A. Usher, Mayfield, Ky.; E. E. Weston, 111 Broadway, New York City; M. W. Keeley, Madison, Wis.; Curtis B. Goode, Dunkirk, N. Y., and Frank R. Allen, Passaic, N. J. The contractor will be the ATLANTIC & CAIRO CONSTRUCTION CO., 111 Broadway, New York. The construction company will probably sublet to a large extent, but is not yet ready to announce its plans nor to ask for any bids. Noted on March 26.

CANADA.—The House of Commons on April 8 passed a resolution unanimously declaring that the time had arrived for the early construction of a railway to Fort Churchill on Hudson Bay. Hon. Frank Oliver, Minister of the Interior, speaking for the government, said that definite announcement as to the intention of the government would be made before the session closed.

CHICAGO, MILWAUKEE & ST. PAUL.—The State Railroad and Warehouse Commission has granted permission to the C., M. & St. P. Co. to build a cut off on its main line from Hastings to Red Wing, Minn., which will cut out the stations of Etter and Eggleston, on condition that it will grade and keep up the wagon roads from the present stations to the new stations.

COLORADO, HEREFORD & GULF.—At a recent mass-meeting of residents of Deaf Smith and Castro Counties, held at Hereford, Tex., $50,000 were subscribed for the proposed Colorado, Hereford & Gulf R. R. It will be constructed by the CULLEN CONSTRUCTION CO., of Newark, N. J.

COLORADO & NORTHERN.—Paul Blount, Ch. Engr., 820 Equitable Bldg., Denver, Colo., advises us that surveys have been made for the proposed Hayden-Hahn's Peak line. It will be 60 miles long. Capital has not been obtained. Right-of-way is secured. Date for letting contracts is indefinite. B. L. Dorsey is Pres., St. Louis, Mo. Noted fully on Jan. 23.

COLUMBIA RIVER, OUTLOOK & NORTHERN.—W. McF. Stewart, Pres., Outlook, Wash., advises us that construction contracts will not be let before next fall. It is planned to complete all surveys and the preliminary work of securing right-of-way this year. The proposed road will extend from Vancouver to Spokane, Wash., 300 miles.

DANVILLE, COLUMBIA & SCOTTSVILLE.—EDWARD BURNS, of Springfield, Mo., has been awarded a contract for grading 160 miles of this railroad. Grading will begin at McKinney, Ky., and extend southward from that point. The new road will run trains over the Cincinnati Southern from McKinney to Danville, a distance of 14 miles. The shops and principal offices will be located at Danville, Ky. Noted on April 2.

ELGIN, WOODSTOCK & LAKE GENEVA.—Incorporated in Illinois to build a railroad from Elgin to a point near Richmond Township, McHenry County, Ill. Principal offices will be at Elgin. Capital stock, $25,000. Incorporators: G. W. Young, Algoma, Wis.; Frank R Spear, George H. Bryant, William C. Hascall, Chicago; John A. Kirkland, Elgin, Ill.

GALVESTON TERMINAL.—Stockholders have approved a bond issue not to exceed $5,000,000 to construct terminals on Galveston Island for the Rock Island-Frisco and Colorado Southern lines, which make their entrance into Galveston over the tracks of the Trinity & Brazos Valley. About $1,000,000 has already been expended and the improvements will be completed as rapidly as possible, it is reported.

GEORGIA & FLORIDA.—A. & C. WRIGHT, of Atlanta, Ga., have been awarded an additional contract to build nine miles of the Georgia & Florida Ry. between Douglas and Garrant, Ga., to which will probably be added ten miles between Garrant and Hazlehurst, Ga. An additional contract probably will be let within a month for construction between Vidalia and Hazelhurst, Ga. These contractors were recently awarded the contract for 28 miles between Valdosta and Nashville, Ga. Noted last week.

GRAND TRUNK PACIFIC.—An extension of time of two years has been granted for the following branches from the main line of the Grand Trunk Pacific: (1) Belt line around the City of Winnipeg, Man., to connect with the other railway systems, and passing, if deemed advisable, through the outlying portions of that city. (2) From Winnipeg, Man., to a point on the international boundary within a distance of 25 miles east or west of the Red River. (3) From Neepawa, Man., to a junction with the Grand Trunk Pacific to Brandon and from thence to Regina, Sask. (4) A line from Brandon to a point on the southern boundary of the province in the vicinity of Turtle Mountains. (5)

From a point on the western division in the vicinity of Township 22, range 6, west of the second meridian, to Yorkton, Sask. and from thence to a port on Hudson Bay. (6) From the same point as the above branch southward to Regina, Sask. and thence to the international boundary near North Portal. (7) From a point on the western division between 106th and 107th degrees of longitude to Prince Albert, Sask. (8) From a point on the western division between 108th and 109th degrees of longitude to Prince Albert, Sask. INDUSTRIAL NOTES.

THE CROCKER-WHEELER CO., New York City, manufacturers and electrical engineers, announce the removal of its offices to the Hudson Terminal Building, 30 Church St.

PORTER BROS. & WELCH, Railroad Contractors, Vancouver, Washington, have placed an order for a number of 5,000-c. p. Milburn lights, manufactured by the Alexander Milburn Co., Baltimore, Md., for work on Northern & Pacific Railway.

WALTER H. JENKINS, formerly with the American Car & Foundry Co., has been appointed Western Representative of the Youngstown Car Manufacturing Co., of Youngstown, Ohio, builders of cars for industrial purposes, and will have his office in Chicago.

THE EXECUTIVE OFFICES of the Westinghouse Electric & Manufacturing Co., previously at 111 Broadway, New York, N. Y., and the New York Sales Offices and Export Offices of that company, previously at 11 Pine St., have been removed to the new City Investing Building, 165 Broadway, New York.

THE GENERAL PNEUMATIC TOOL CO., Montour Falls, N. Y., announces the removal of its New York City office to the Hudson Terminal Building, 50 Church St. The company also states that, owing to the fact that its business in electric cranes and hoists has grown so rapidly of late, the firm name will, on May 18, be changed to the Shepard Electric Crane & Hoist Co.

THE CANTON-HUGHES PUMP CO., of Canton, Ohio, recently shipped to Swift & Co., of South St. Joseph, Mo., two duplex low service pumps, making a full carload. These pumps are intended for their large packing plant at that point and have a capacity of three million gallons each in 24 hours. This company also secured a contract recently to furnish a 16 and 27 × 12 × 24 high duty, crank and fly wheel, cross compound pumping engine, with surface condenser, to the Frankfort Water-Works Co., Frankfort, Ind. Another recent contract was to supply the Ohio Salt Co., Rittman, Ohio, a 16 × 8 × 24 duplex outside center packed pump.

THE W. W. PATTERSON CO., Pittsburg, Pa., advises us that it has recently completed for the American Bridge Co. an order of eight 24-in. six-sheave wood blocks weighing 1,350 lbs. each. These were for 60 tons capacity and were the largest wood block ever made. They will be in use on the Havre de Grace Bridge for the B. & O. R. R. Co. At the present time the company is making for the Carnegie Steel Co. two eight-sheave steel blocks for ¾-in. cable. These blocks are for 100 tons and the makers state that as far as known are the largest blocks ever made. They will weigh 2,500 lbs. each.

THE SOUTHWESTERN MACHINERY & SUPPLY CO., of Los Angeles, Cal., recently organized for the purpose of representing manufacturers of machinery and supplies exclusively in the Southwest, is under the management of Chas. L. Michod, who has been in this same business at St. Louis and Havana, Cuba, for the past five years. The President of this company is J. Wallace of 42 Broadway, New York, and T. G. Finley of Los Angeles is Vice-Pres. and Treas. Considerable business with the Mexican trade is also anticipated, but Southern Nevada, Arizona and Southern California will be the principal territory covered.

TRADE PUBLICATIONS.

REINFORCED CONCRETE.—Tucker & Vinton, 41st St. and Park Ave., New York City. Paper; 8 × 5½ ins.; pp. 63; illustrated.

The pamphlet contains illustrations of some of the more prominent structures erected by Tucker & Vinton during the past ten years, during which time, according to the preface, they have devoted themselves exclusively to concrete construction of every type.

VAULT AND SIDEWALK LIGHTS.—The Berger Manufacturing Co., Canton, O. Paper; 6 × 9 ins.; pp. 48; illustrated.

The Berger Co. manufactures various kinds of metal and glass slabs to be used for lighting basements and vaults which are under sidewalks or other areas where loads are liable to come. This latest catalog describes these various devices together with weights, sizes and methods of erection.

EARTH AND STONE HANDLING MACHINERY.—Western Wheeled Scraper Co., Aurora, Ill. 9¾ × 6½ ins.; pp. 105; illustrated.

The catalog contains complete illustrated descriptions of all kinds of road and contractors' machinery, including wheeled scrapers, drag scapers, ditchers, wagon loaders, plows, rock and ore crushers, elevators, dump cars, ore cars, stone cars, dump wagons, street sweepers and garbage carts. Particular attention is paid to the air controlled dump cars, such as are used on the Panama Canal.

PATENT FLOORING.—J. G. Ellendt & Co., No. 1 Madison Ave., New York City. Paper; 3½ × 9 ins.; double folder; illustrated.

This company has on the market a sanitary flooring known as "Elasto," which is a cement composition adaptable for flooring "because of its silent, non-slippery, and agreeable nature under foot, its waterproof and sanitary nature, its extreme durability, its elegance and adaptability to pleasing design and its fireproof qualities."

ASBESTOS WOOD.—H. W. Johns-Manville Co., 100 William St., New York City. Catalog No. 107. Paper; 3½ × 6 ins.; pp. 20; illustrated.

Prof. Charles L. Norton has invented an asbestos wood that is mineral in character, being made principally from asbestos fiber, and is fireproof, but which can be sawed and cut and in fact has most of the properties of ordinary wood. It is made into various stock shapes by the Johns-Manville Co. for all uses to which wood is now applied.

HIGH-PRESSURE GATES.—New Jersey Foundry & Machine Co., New York. Stiff paper; 10½ × 14¼ ins.; pp. 4; illustrated.

The article on the high-pressure gates for the Pathfinder and Shoshone dams, U. S. Reclamation Service, Wyoming, by Mr. F. W. Hanna, which appeared in Engineering News of Jan. 2, 1908, is here reprinted beneath a calendar for the year 1908. Some views in addition to those given in our article are included. The gates on the dam were built and erected by the company named above.

WELL PUMPS.—Keystone Driller Co., Beaver Falls, Pa. Paper; 8 × 11¼ ins.; pp. 60; illustrated.

The Dowie deep well pumps and various accessories, together with pump and well supplies, are here described and illustrated. Useful information is also given. The conical valves used in the Downie pump are illustrated in detail, and particular attention is given to electric motor pumps for use in place of the air lift. The title-page states that the company named has succeeded to all the property and rights of the Downie Pump Co., of Downieville, Pa.

ROCK DRILLS.—Wood Drill Works, Paterson, N. J. Four-page folder, 6 × 9 ins.; illustrated.

To bring their drills to the attention to possible users, the manufacturers have published this circular containing four half-tones and a very brief description of the Zuni Dam at Black Rock, N. Mex. Wood drills were used on the work. The description of the dam given in the circular was prepared by Mr. John B. Harper, M. Am. Soc. C. E., of Santa Fe, N. Mex., Superintendent of Irrigation of the U. S. Indian Service, Department of the Interior. The drills used on this work were operated by Navajo Indians. The dam was completed in January, 1908. It is a combination rock and earth-fill structure, 90 ft. high and 450 ft. long at the top.

REINFORCED CONCRETE.—Hennebique Construction Co., 1170 Broadway, New York City. Paper; 8 × 11 ins.; pp. 95; illustrated.

One of the oldest companies in the comparatively new business of designing and erecting reinforced concrete structures is the Hennebique Company, which started in Paris, working under the Hennebique patents, and has since spread all over the world. This latest catalog is a well illustrated list of some of the large and more recent work of the company.

For other Proposal Advertisements see pages 43, 44, 46, 47, 48, of Advertisements and Construction News page 142.
